ZYVORAI LABS · CUSTOMER DOCUMENTATION

Axiom

Admin Basics

2026-08-29

Endpoints

Service	URL
Axiom UI	`https://<host>:30590/`
API health	`curl -k https://<host>:30590/api/v1/health`
Session	`curl -k -u demo:demo https://<host>:30590/api/v1/session`

Namespace: `axiom-system`. Cluster deploys are **HTTPS only**.

If **30590** is allocated, redeploy with `AXIOM_NODE_PORT=30591` (or another free port).

Ports

Service	Port	Notes
Axiom UI	`30590`	NodePort HTTPS (self-signed lab cert OK)
In-cluster	`443`	Service → container `5090`
Local demo	`5090`	HTTP OK for `AXIOM_MODE=demo` only

Port-forward:

```
kubectl -n axiom-system port-forward svc/zyvor-axiom 5090:443
curl -k https://localhost:5090/api/v1/health
```

Secrets and env

Name	Purpose
`zyvor-axiom-auth`	Operator username/password
`zyvor-axiom-tls`	TLS cert/key
`zyvor-axiom-users`	Local users JSON (production)
`zyvor-axiom-integrations`	Integration config

Env	Purpose
`AXIOM_MODE`	`demo` or `kubernetes`
`AXIOM_USERNAME` / `AXIOM_PASSWORD`	Operator Basic auth
`AXIOM_TLS_CERT` / `AXIOM_TLS_KEY`	Mounted TLS paths
`AXIOM_CLUSTER_NAME`	In-cluster label (default `in-cluster`)
`AXIOM_ATLAS_URL` / `AXIOM_ATLAS_TOKEN`	Atlas
`AXIOM_PACKETWOLF_URL` / `AXIOM_PACKETWOLF_API_KEY`	PacketWolf
`AXIOM_NODE_PORT`	Override NodePort
`AXIOM_OIDC_*`	OIDC groups/claims
`AXIOM_SESSION_SECRET`	Stable sessions across restarts
`AXIOM_TRUSTED_PROXY_HEADER`	Real client IP behind proxies

Lab login **`demo`** / **`demo`** when SSO is off.

Auth model

- Public: `GET /api/v1/health`
- Protected: Basic, OIDC/SAML cookie, or API key
- Viewer: GET allowed; mutating verbs **403**
- WebSocket / port proxy: `?access_token=<base64 user:pass>` when needed

OIDC: register a **public** client (Authorization Code + PKCE). Redirect URI:

`https://<host>:30590/api/v1/auth/oidc/callback`

Operate from the console (admin)

1. **Settings → Integrations** — Save + Test Atlas/OIDC/PacketWolf.
2. **Users** — create admin/viewer accounts.
3. **Ops** — RBAC roles/bindings; Identity when Haven is present.
4. After restart, re-login; confirm Overview metrics.
