Axiom

Customer Documentation Overview

2026-08-29

Axiom is a private in-house cloud console on **k3s and Kubernetes** — applications, VMs, storage, identity, and networking in one Liquid Glass UI.

You want to...	Open
Install and sign in	Getting Started
Learn the shell	Using the Dashboard
Screen-by-screen UX	Page-by-page guides
Look up any route	Complete page index
Deploy / auth / ports	Admin basics
Multi-page recipes	Common workflows

Printable PDFs

```
set -a; source scripts/customer-docs/product.env; set +a
node scripts/customer-docs/build-customer-pdfs.mjs
```

Output lands in `pdf/`.

Product at a glance

```
UI / API   →  https://<host>:30590/   (NodePort HTTPS; AXIOM_NODE_PORT to override)
Local demo →  http://<host>:5090      (AXIOM_MODE=demo)
Health     →  GET /api/v1/health
Lab login  →  demo / demo when SSO is off
```

Never publish lab IPs — use `<host>` everywhere.
