GO BINARY	SIGN-IN METHODS	LANGUAGES	AGENTS ON NODES

RUN

Applications first

Deployments, StatefulSets, DaemonSets and CronJobs with start, stop, restart, scale, rollout history and undo.

DEBUG

Inside any container

Live log tail, an interactive terminal per Pod, a plain-English "why isn't it running", and health-check findings with fixes.

FLEET

Every cluster, one glance

Reachability, latency, nodes and pods for each registered cluster, with one-click switching.

OPS

Helm, GitOps, cost

Chart install and rollback, Argo CD and Flux, autoscaling (HPA, VPA, KEDA), budgets and rightsizing.

SECURE

Roles enforced in middleware

Local, OIDC, SAML and LDAP sign-in, admin / operator / viewer roles, TOTP, namespace-restricted viewers, audit log.

LICENSE

Free to try, licensed to run

Zyvor Production License v1.0. Non-production use is free; production needs a commercial license.

```
# install into a cluster
helm install axiom deploy/helm/axiom \
  --set auth.username=admin --set auth.password='…'
# then open https://<node-ip>:30590
```
